

[illegible]

A schematic diagram of a rectangular frame assembly. The frame is composed of a light blue outer border and a white inner channel. Two horizontal rollers, shown in grey with black end caps, are positioned within the frame, one near the top and one near the bottom. Dimension lines indicate the following parameters: C is the total width of the frame; D is the total height of the frame; and F_w is the vertical distance between the centers of the two rollers. A horizontal dashed line passes through the center of the frame.
